Value Stream Mapping

Course No. 122

This course is designed to teach students to reduce waste through value stream management and integrating tools. Concepts of demand, sustain flow and leveling are demonstrated as well as how Value Stream management links-controlled process flow to Lean concepts.

Course Benefits

Provides students with a basic understanding of value stream mapping and its implementation. This Lean Management tool allows visualization of the steps necessary to take from product design to delivery to customer.

Prerequisites

Knowledge of Lean Concepts

Duration

One Day (7 hours)

Learning Objectives

At the end of this course, participants will be able to:

1. Lean thinking
2. Value stream mapping process
3. Select the value stream
4. Map the current state
5. Determine metrics
6. Map the future state
7. Evaluate outcome

Topics Covered:

- Identifying Waste (Muda) in the Value Stream
- Building the Value Stream Map
- Identify Value Stream
- Assumptions for Value Stream Mapping
- Simple Symbols
- Be the Product (Gather Data)
- Approach Steps to Value Stream Mapping
- Recording Process Times

Instructor:

The seminar leader is a Lean Six Sigma Master Black Belt with over 15 years' experience in implementing methodologies.
