Lean Supply Chain & Supplier Management

Course No. 230

This course is designed for individuals tasked with improving supply chain and material management. During the course, using “best in class” case studies, process teams and business leaders learn how to implement the best practices in order to translate strategy into action plans.

Course Benefits

Provides participants with an understanding of the supply chain and how to unlock the secret to improved supply chain performance, thereby reducing waste, and making the supply chain lean.

Prerequisites

None

Duration

Two Days (14 hours)

Learning Objectives:

At the end of this course, participants will be able to:

1. Understand supply chain and supply chain performance.
2. Review “best in class” supply chain and material management case studies.
3. Develop a roadmap to implement best practices.
4. Translate strategy into action plans to reduce waste and optimize the supply chain.
