AI in Conducting Education and Training

Course No. 533

AI (artificial Intelligence) is important because it transforms how we live, work, and solve problems. AI is redefining how education and corporate training are designed, delivered, and personalized.

Course Benefits

This AI course provides educators, trainers, and learning professionals with the knowledge and tools to integrate AI into teaching and training practices. Participants will explore AI-driven learning platforms, content generation tools, adaptive learning systems, and strategies for enhancing learner engagement and outcomes.

Prerequisites

None

Duration

Three Days (21 hours)

Learning Objectives

At the end of this course, attendees will be able to:

1. Understand the role of AI in modern education and training
2. Apply AI tools to design and deliver personalized learning experiences
3. Use Generative AI for content creation, assessments, and simulations
4. Enhance learner engagement through AI- powered platforms and chatbots
5. Evaluate ethical and responsible use of AI in education
6. Implement AI solutions that align with learning objectives and organizational needs

Topics Covered:

- Introduction to AI in Education
 - AI trends transforming learning & training
 - Benefits and challenges of AI adoption in education
- AI for Learning Design
 - Generative AI for lesson plans, presentations, and course materials
 - AI-powered content curation and knowledge management
 - Adaptive learning systems and personalization
- AI in Training Delivery
 - Chatbots and virtual teaching assistants
 - AI-driven learning management systems (LMS)
 - Simulation and scenario-based learning with AI
- Assessment & Feedback with AI
 - Automated quiz and test generation

Email: Training@qpsinc.com Website: www.qpsinc.com

- AI-supported grading and learner analytics
- Providing real-time, personalized feedback
- Responsible & Ethical Use of AI in Education
 - Data privacy and security considerations
 - Addressing bias in AI-powered learning systems
 - Human oversight in AI-assisted teaching
- Implementing AI in Educational Settings
 - Strategies for AI integration in schools, universities, and organizations
 - Tools and platforms for AI learning
 - Case studies of successful AI adoption in education & training

Who Should Attend?

This course is ideal for product managers and product development teams, R&D, innovation, and engineering professionals, UX/UI designers and digital product creators, or entrepreneurs and business leaders driving AI-powered innovation.

Instructor

The instructor is a professional with 10+ years of AI experience.
